

Lesson 2: Introduction

LESSON 2
**BOUNDARIES, PATTERNS
AND INTERCONNECTIONS**

Opens in new tab

Lesson 2: Introduction

In this lesson, you will begin understanding a system's boundaries, patterns, and interconnections. You will also analyze a case study (sometimes called a scenario) to solidify your understanding of the important concepts of systems thinking.

Learning Objective

Consider the following learning objective as you move through the lesson:

- Identify a system's boundaries, patterns of events and behavior, and interconnections.
