

User Experience Design

# Lesson 3 Summary

Take a moment to reflect on what you have learned about UX design tools and techniques. Do you feel comfortable with how, when and why to run an ideation workshop? What is the most important thing to consider when running these workshops?

What about sketching? Why is sketching important? What tools or equipment do you need to sketch your ideas? Try running the rapid sketching exercise with friends or family for practice with this tool.

Finally, what are the pros and cons of prototypes? When should you create prototypes, and what tools do you need to accomplish this? And can you name at least two of the classic supplier mistakes that annoy clients?

Great! It looks like you're ready to continue to the next lesson in this section.
