Knowledge Check

User Experience Design

How well do you know the information presented in this section? Take this knowledge check to find out. If you do well, move on to the next section. If you are unable to answer the questions, go back to the lesson and review the content.

Question 1

1 point possible (ungraded)

Which statement accurately describes usability testing?

○ Usability testing is a focus on testing users to make sure they are working correctly with the tool.

○ Usability testing is a form of market research.

○ Usability testing should be done at the final stages of the User Centered Design (UCD) process.

○ Usability testing involves asking people to use something and observing what problems arise from using it.

[Submit]

Question 2

1 point possible (ungraded)

Which statement accurately describes wireframes?

○ They include graphic design elements such as imagery and font type.

○ They do not allow for participants to understand the navigation and flow, but the content and wording is clear.

○ They allow you to explore, test, and iterate design ideas.

○ They can be difficult to edit.

[Submit]

Question 3

1 point possible (ungraded)

What is a benefit of using prototypes?

○ There are many templates that are available to reuse.

○ Quoting design and build time is easier.

○ They mask potential design problems.

○ They avoid the need for complex dynamic interactions.

[Submit]

Question 4

User Experience Design

at which it allows people to generate and share ideas?

○ Low-fidelity digital

○ Paper

○ Mobile

○ High-fidelity digital

Submit
